Ask for the visit of one of our project engineers !**

RediTab® Plus installation 1 tier + mezzanine on top (surface 2500 m²) intended for a later extension to a multi-tier installation (2 tier + mezzanine on top).

a few years later ...

An original patented REDIRACK® shelving system featuring DESIGN & ACCESSORIES and a COST SAVING conception and installation.
Loads up to 400 kg per RediTab® Plus shelf.

The RediTab® plus shelving system is composed on one hand of uprights & brackets that clic into each other thus creating a solid frame and on the other hand the easily moved shelves.

The upright, a T profile, has a flush unslotted front as to make it more esthetical.

Standard heights are 1 • 1,75 • 2 • 2,25 • 2,50 • 2,75 • 3 and 3,25 meter. Higher uprights can be obtained by the use of upright sleeves (e.g. for multi-tier installations: 2, 3 ... tier).

The slots on the inside of the upright allow to adjust the position of the shelves per 25 mm. The same slots can also be used to install the full range of accessories.

Each shelf is supported by two brackets that just clic into the upright without the use of tools. The shelf loads depend on the number of shelf stiffeners that are welded to the shelf.

Obviously the RediTab® system can also be combined with the CORBAC range (plastic bins) aswell as with the CORNIX box files.

RediTab® offers you the perfect solution for an adequate storage of small parts, suspended files, archives, garment storage, bulky parts on a mezzanine, etc.

- RediTab® Plus : shelf width 1000 & 1250 mm (height 30 mm)
shelf depth 300 to 800 mm
- RediSpan® : shelf width 1200 to 2400 mm (height : 50-70 mm)
shelf depth 400 to 1000 mm and more ...

Briefly RediTab® Plus saves you money and space !

Delivered unassembled. Easy installation.
 On request our specialized installers will install your RediTab® Plus shelving system and it's accessories.
 Ask for a free quote !

COMPONENTS & ACCESSORIES

Our project engineers are at your disposal for all your questions regarding loads and complex installations. Below an outline of our standard RediTab® Plus racks composed of : 4 T uprights (2000 mm high) each time with a plastic base and a plastic top cap; 5 shelves with their brackets; for the starter unit 1 cross bracing is included. For the extension units the cross bracing has to be added when required (1 cross bracing required for every 3 units).

An evolving system as the RediTab® Plus system carries of course a lot of accessories. Below you can find an outline of the main components. This is of course not a limited list. If you don't find that particular accessory that you need, please do not hesitate to consult us so we can look for the best solution to your problem.

- 8. Plinth
- 13. Frame for suspended files
- 14. Reinforcement beams
- 16. Shelfender
- 18. Divider

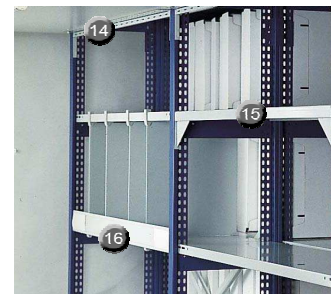

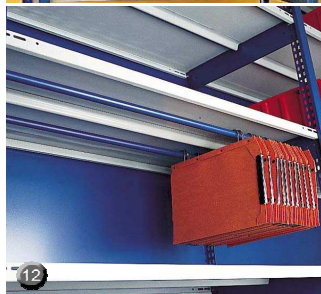

- 1. T upright.** For the starter unit 4 uprights, 2 for the extension unit. Standard heights : 1 - 1,75 - 2 - 2,25 - 2,50 - 2,75 - 3 - 3,25 meter. Higher uprights can be obtained using the upright sleeves. Standard finish of the uprights : blue RAL 5010.
 - 2. Plastic base.** Prevents damage by the upright to your floor or carpet. Two per upright : 1 as base and 1 as finishing cap at the upper side of the upright as to make an esthetical finish. For heavier loads (e.g. mezzanines & multi-tier installations) special steel bases are available.
 - 3. Brackets.** Two per shelf. Depths : 300 - 350 - 400 - 500 - 600 and 800 mm.
 - 4. Shelves.** Available in 1000 and 1250 mm width (depths see brackets above). Standard finish : light grey RAL 7035. (800 mm deep shelf = 2 x 400 mm)
 - 5. Shelf stiffeners.** Are welded under the shelf in order to raise the load possibilities. 1, 2 of 3 per shelf.
 - 6. Cross bracing.** 1 per 3 units. For racks higher than 2,25 m 2 cross braces are required.
 - 7. Side & back panels.** Available in all standard heights, widths and depths. Available in wood or steel.
- Accessories.** For all other accessories from the RediTab® range see below.

◀ MODULAR COUNTERS

Based on the RediTab® Plus shelving system.

Well adapted for garages, whole-salers, industrial warehouses, etc.

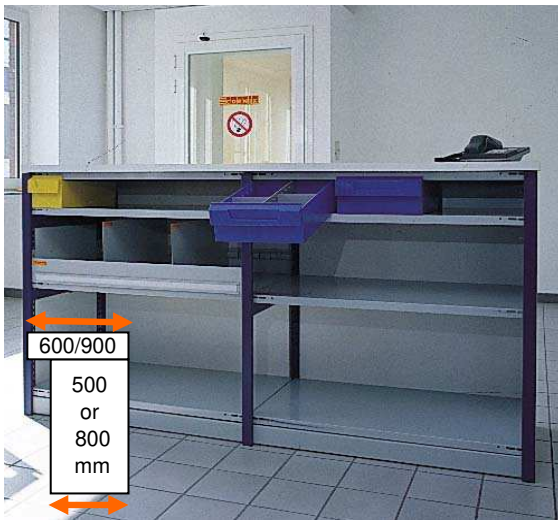

Height 1040 mm. Standard lengths from 1052 mm up to 4058 mm. Longer counters are available on request (per module of 1000 or 1250 mm). Counter depth is always 500 mm with an overhanging worktop of 600 mm. Standard equipped with 3 shelves (2 levels) per module. Extra shelves are available at extra cost. An 800 mm deep counter (worktop 900 mm) is available on request.

Many accessories are available :

- plastic bins MODULBOX
- plinths for the backside of the counter
- 100% roll-out shelf (45 kg uniformly distributed load)
- steel dividers
- steel side panels
- rubber layer.

Technical characteristics :

- uprights blue RAL 5010
- shelves light grey RAL 7035
- side panels and frontpanels in white melamine
- worktop is a 39 mm scratchproof Formica panel rounded one side
- delivered unassembled. Installation on request.

• per full roll 10 m x 1,4 m	JC3LM0	
CORRUGATED RUBBER 3 MM	JC3SR0	
• per full roll 10 m x 1,2 m	JC3SM0	
• per meter 1 m x 1,2 m		

CUPBOARD DOORS ▶

In certain areas of your RediTab® Plus installation it can be necessary to insert a protected module. Thanks to the RediTab® cupboard doors this can be done without problem. Cupboard doors are available in 1000 mm width and are 2000 mm high, including plinth and canopy.

Don't forget to order the necessary side & back panels !

Standard finish : doors light grey RAL 7035, steel side and back panels blue RAL 5010.

Each doorset is equipped as a standard with a day and night locking system with a sunk grip. The combination of dividers (see above) with the doors is no problem. The drawers below can also be combined with the cupboard doors. Glass shelves are available on request.

TYPE	H x W (mm)	CODE	€
Set cupboard doors	2000 x 1000	TPOR200100G0	

ADHESIVE PRICE RAILS ▶

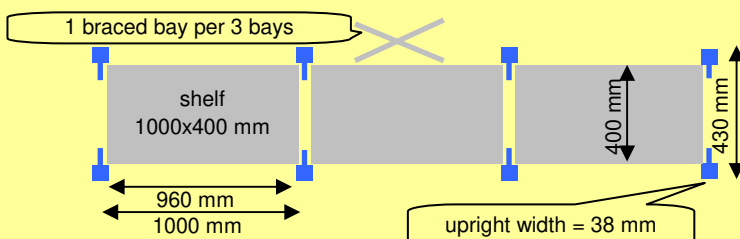

To install identification labels in your RediTab® Plus shelving system. Available for the shelves of 1000 & 1250 mm. Heights 20, 34 of 42 mm. Transparent PVC.

You can find an extensive choice of magnetic labels & adhesive price rails in our webshop.

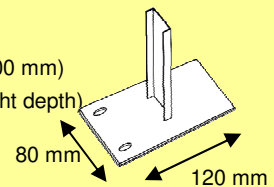

LENGTH (mm)	H (mm)	H LABEL (mm)	CODE	€
950	20	18	SDS20950T0	
1200	20	18	SDS201200T0	
950	34	30	SDS30950T0	
1200	34	30	SDS301200T0	
950	42	40	SDS40950T0	

HOW TO CALCULATE THE DIMENSIONS OF YOUR INSTALLATION ?

distance between uprights :
shelf 1000 mm : 960 mm (center/center upright : 1000 mm)
(useful length of shelf : 1000 mm)

depth :
depth shelf (e.g. 400 mm)
+ 2 x 15 mm (upright depth)

don't forget to add :

- ▶ 1x upright width (38 mm)
- ▶ the overhang of the base plate (only in case of steel base : 40 mm once to be added to the total length)

example :

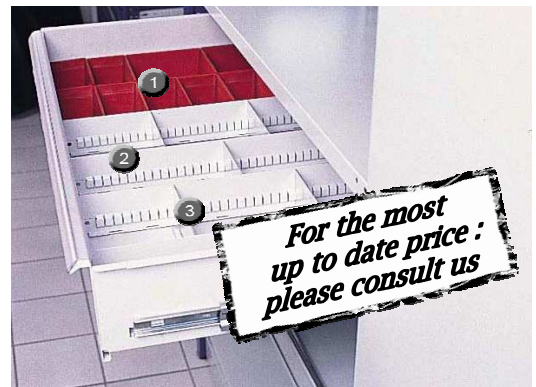

3 bays of 1000 mm make a total of : $3 \times 1005 + 1 \times 38 = 3053 \text{ mm} + 40 \text{ mm overhang base plate} = 3093 \text{ mm}$

DRAWERS ►

For a further equipment of your RediTab® Plus installation steel drawers with a module width of 1000 mm are available. The built-in depth is 500 mm which means that the depth of your rack has to be 500 mm. The same drawer can also be installed in a 600 mm deep rack at an extra cost. However this does not change the dimensions of the drawer.

Each drawer runs on 2 heavy duty telescopic guides 100 % extensible and can carry up to 70 kg. A full length handle allows you to put a price rail onto it allowing you to mark the identification of the contents of the drawer (price rail is optional). A central locking system is also available as an option as are a full range of dividers and bins.

2 possible drawer heights : 100 & 200 mm. **Finishing** : light grey RAL 7035.

HOW TO DIVIDE YOUR DRAWER?

1 Red conical polystyrene bins to be placed into the drawer

For certain applications galvanized shelves are required : RediTab® Plus with sendzimir shelves, brackets, bracing and dividers.

Redirack

EUROPE'S FIRST MANUFACTURER OF STORAGE SYSTEMS

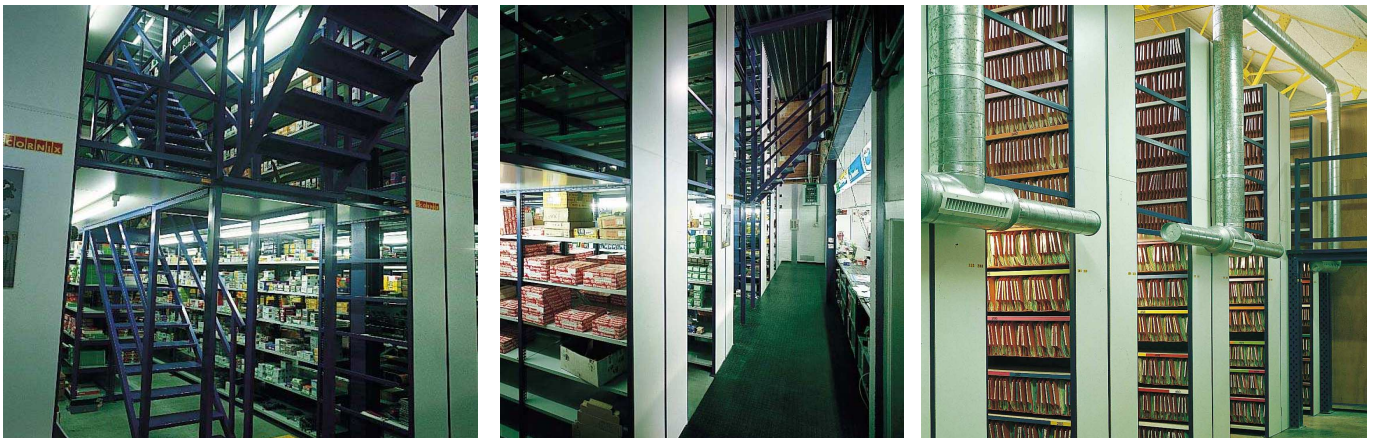

REDITAB® PLUS • MULTI-TIER & MEZZANINES

2 TIER INSTALLATION

3 TIER INSTALLATION

Multi-tier RediTab® Plus installation 2, 3 or 4 tier. For storage of small parts, archives, etc.

INCORPORATED STAIRCASES & HANDRAILS ARE ALSO AVAILABLE.

1 TIER + MEZZANINE

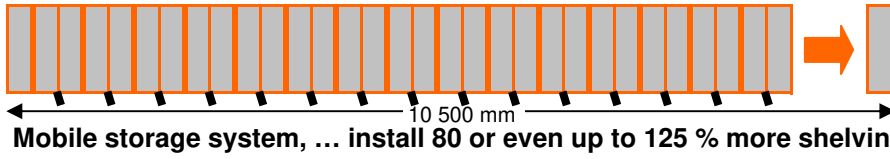

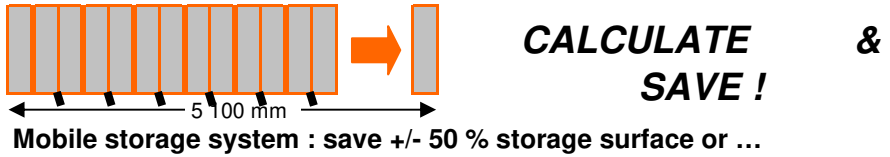

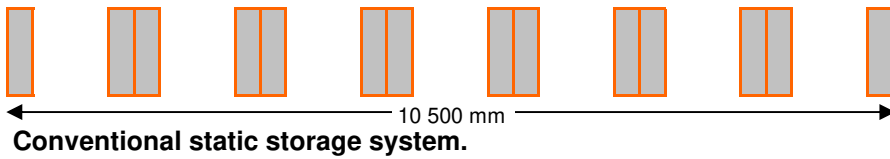

2 TIER + MEZZANINE

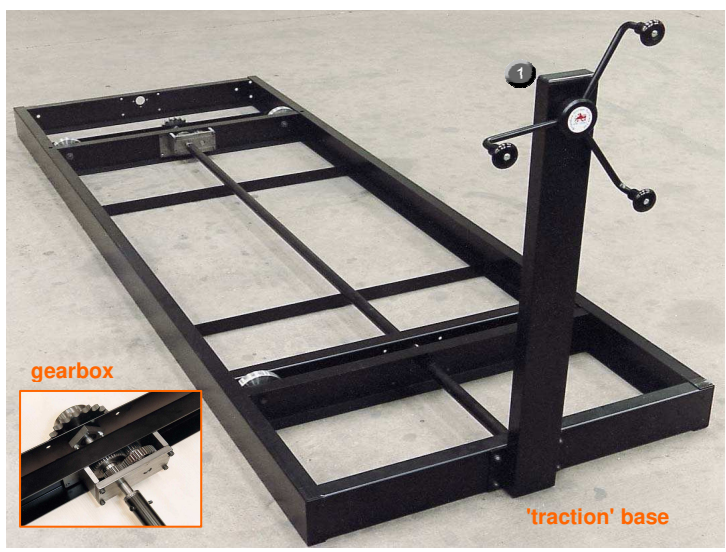

Multi-tier RediTab® Plus installation 2 or 3 tier with mezzanine on top. For storage of small parts, archives, ... and bulky goods on top.

REDITAB® PLUS • MOBILE STORAGE SYSTEM

*Bespoke
on request*
MEASUREMENT

Mobile storage systems allow you to make a more efficient use of your available space in your office, your archive or in your warehouse. They are easy to handle, they reduce the intake of dust and on top of that the mobile bases can receive different types of shelving systems e.g. RediTab® Plus shelving system (1 & 2) or RediSpan® long span system (3).

WE CAN PROPOSE YOU TWO DIFFERENT SYSTEMS

THE FRICTION SYSTEM

in which the bases are pushed over a rail. This system is the cheapest but it is only suitable for short bases with a rather low load.

THE TRACTION SYSTEM

in which the bases are moved by a gearbox with gears that grip into a rail. Slipping becomes impossible and therefore lengths of 13 meter with heavier loads up to 35 tonnes can be achieved.

The best system in the market !

Your REDIRACK engineer will make you a free quote for your mobile installation.

Delivered not assembled.
On request our specialized installers will install your mobile storage system. Ask for a free quote !

REDITAB® LIGHT • SHELVING SYSTEM

LIGHT SHELVING DERIVED FROM THE REDITAB® PLUS RANGE

BOLTLESS SHELVING SYSTEM REDITAB® LIGHT

The REDITAB® Light shelving system is composed on one hand of uprights & brackets that clic into each other thus creating a solid frame and on the other hand the easily moved shelves. This type is a "light" version of the REDITAB® PLUS range and uses the same brackets, shelves and cross bracing. Accessories are not available. Assembling is as easy as the REDITAB® PLUS range.

This type of shelving system is recommended for light storage (maximum 100 kg per shelf - maximum 800 kg per bay) such as archives or small parts. Cheaper than the REDITAB® PLUS range.

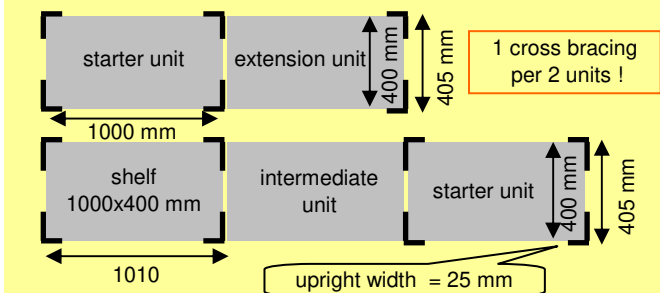

- ▶ **Angle upright 40x25x1,50.** 4 uprights per starter unit, 2 per extension unit. Standard heights : 2 - 2,25 - 2,50 meter. Greater heights are not possible. Standard finish : sendzimir.
- ▶ **Plastic base.** Prevents damage by the upright to your floor or carpet.
- ▶ **Brackets.** Two per shelf. Depths : 300 - 400 - 500 and 600 mm. Sendzimir finish.
- ▶ **Shelves.** Available in 1000 mm standard width (depths see brackets above). Standard finish : sendzimir. (depth 500 mm = 2x250 / 600 = 2x300 mm)
- ▶ **Cross bracing.** 1 per 2 units. For racks higher than 2,25 m two cross braces are required. Standard finish : sendzimir.
- ▶ **Accessories :** not available in the Light range. Please consult the REDITAB® PLUS range.
- ▶ **Mezzanines & multi-tier installations :** not possible with this type of upright. For such installations please consult the REDITAB® PLUS range.

REDITAB® LIGHT rack width 1000 mm (height 2000, 2250 & 2500 mm) - finish completely sendzimir.

	600 (2x300)	100	6	TRC100602506DZ0		TRC100602506SZ0		T1006010ZT0	
Extra cross bracing				TRC100Z0	incl.	TRC100Z0		-	-

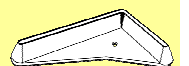

Above you can find prices for starter units (4 light uprights, 5-6 shelves & 1-2 cross bracing) and for extension units (2 light uprights and 5-6 shelves, cross bracing to be added when required). Each rack is delivered not assembled and with the necessary plastic bases.

HOW TO CALCULATE THE DIMENSIONS OF YOUR INSTALLATION ?

example : 3 bays of 1000 mm make $3 \times 1010 + 1 \times 10 = 3040$ mm

- total depth : depth shelf (e.g. 400 mm) + 5 mm
 distance between uprights for shelves 1000 mm :
- starter unit : 950 mm (center/center upright : +/- 1005 mm)
 - extension unit : 975 mm (center/center upright : +/- 1005 mm)
 - intermediate unit : 1000 mm (center / center upright : +/- 1005 mm)
 - the bracing can only be installed on a starter unit :
- 2 extension units have to be converted into 1 starter unit and 1 intermediate unit by inverting 2 uprights.
- don't forget :**
- ▶ add 1x 10 mm for the plastic base.

REDITAB® JUNIOR • BOLTED SYSTEM

ON STOCK

VARIATIONS WITH SHELVES & SLOTTED ANGLES

This product is the classic in the REDIRACK range : it has been manufactured by us since 1958 in it's original design. Customers who bought this system 20, 30, 40 years ago can even today extend their installation with the same parts.

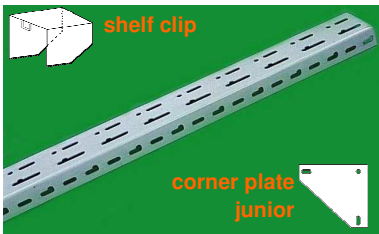

REDITAB® JUNIOR BOLTED SHELVING SYSTEM

- ▶ for garages, storage areas, workshops, factories, etc.
- ▶ multiple references : most ministries, schools, multinationals, boroughs and lots of small businesses.
- ▶ many references abroad : France, Gabon, Congo, ...
- ▶ alle steel parts are lacquered light grey RAL 7035.
- ▶ assembled with bolts and nuts.
- ▶ no bracing.
- ▶ in some cases bolts can be partly replaced by clips.

REDITAB® JUNIOR RACK length 1000 mm (height 2000 mm)
